DETAILED ACTION

Applicant's preliminary amendment filed on 22 May 2006 is acknowledged and entered. Following the amendment, the original claims 1, 4-7, and 11-18 are canceled, and the new claims 19 and 20 are added.

Currently, claims 2, 3, 8-10, 19 and 20 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2, 3, 8-10 and 19, drawn to an isolated nucleic acid, an expression vector comprising said nucleic acid, a host thereof, classified in class 435, subclass 69.1.
- II. Claim 20, drawn to a pair of nucleic acid molecules for PCR, wherein each nucleic acid consisting essentially of a fragment of at least 15 nucleotides, classified in class 536, subclass 24.33.

The inventions are distinct, each from the other because:

Although the nucleic acid of Invention I and the nucleic acid fragment of Invention II may be related since the nucleic acid fragment can be a part of the nucleic acid of Invention I, they are distinct Inventions because they have distinct structures, are used for different purposes, and have a separate status in the art as shown by their different classifications. The search for group II would require an oligonucleotide search of 15-mer fragments of SEQ ID NO:1, which is not required for the search of Group I. As such, non-coextensive searches are required.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and/or recognized divergent subject matters, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143), and (ii) identification of the claims encompassing the elected invention.

Art Unit: 1646

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1646
